

Infinity & DICOM Integrations

Company	Pacs Server	Acquisition Software
Sound-Eklin	Nucleus DICOM TruDR Fusion PACS	VetPACS TruDR CDX' eFilm
Konica-Minolta	Image Pilot	Image Pilot
Schick Technologies, Inc ¹	CDR DICOM	Not supported
SimonDR, Inc.	DMMD Exuo	WhiteCap
Universal Ultrasound	MYPACS	Uses multiple applications
FUJIFILM Medical Systems	Axon	FCR DICOM / FlashIIP
RADinfo Systems	PowerPACS	PowerPACS
IDEXX Digital Imaging ³	ClearCapture Dx [®] IDEXX PACS	ClearCapture Dx [®] IDEXX PACS
A Walsh Imaging Sedecal (VetRay) EB Medical	QXLink	MaxxVue QXVue ²
Fovea	PetPACS QXLink	MaxxVue QXVue ²
Freeware	Conquest	Any supported acquisition software
Hudson Digital Systems	HDSVETPACS	FCR DICOM / FlashIIP
Genesis ¹	OmniArchive	
Asteris ¹	Modality Distribution System	Not supported
EESi	EEArchive PocketPACS	eFilm Workstation FUJI CR
APEXX Digital Imaging	Clarity PACS Server	APEXX BLADE Clarity
Summitt Industries (Innovet DxR)	IDC Sirius PACS	IDC Sirius Modality Worklist
UMG / Del Medical ¹	UMG Small Office PACS UMG Enterprise PACS	Any supported acquisition software
ImaSight	Dragonfly PACS	ImaSight VISION
Aspyra ¹	AccessNET PACS	MedVIEW
ALLPRO Imaging	PACSmart Store and View	PACSmart Acquisition

The following systems do not support the necessary DICOM standards to integrate with the Infinity Practice Management Software:

- × Genesis OmniView
- × Merlin
- × Sigma Aire Dental⁴
- × Progeny⁴

¹ Currently does not support the Modality Worklist Entries.

² Users of QXVue must be running the latest released version of the software to achieve integration.

³ Depending on the version of IDEXX PACS being used, it could require a custom integration with Infinity to invoke the software from Infinity.

⁴ Dental imaging systems pull images into a proprietary format which ImProMed does not have a method available to integrate with at this time.
